

Spotsmith provides lifecycle management of carpets, upholstery, & floors to funeral homes.

This specialty means tailoring services to meet the unique needs of funeral providers. More importantly it is about customizing the way we deliver these services for a funeral director's ease of doing business – Spotsmith manages the entire cleaning process.

Our programs are designed not only to maximize aesthetic and aromatic appeal, but to prolong the life of carpets, upholstery, and floors by minimizing wear from the impact of dirt build-up.

Simplifying Cleanliness for Funeral Homes

Carpet Cleaning

Rug Washing

Drapery Cleaning

Leather Cleaning

Upholstery Cleaning

Proper, consistent maintenance is critical to maximizing the life of carpets, upholstery, and floors. Carpet provides the indoor environment with a natural health benefit. Regular periodic cleanings ensure proper appearance, and keep funeral homes a clean, fresh, healthy setting for everyone.

Spotsmith programs are designed around industry standards from The Institute of Inspection, Cleaning and Restoration Certification (IICRC). The IICRC is an independent, non-profit certification body that sets and promotes high standards and ethics. It also advances communication and technical proficiency within the inspection, cleaning and restoration service industry.

We also integrated recommendations from other organizations like The Carpet and Rug Institute (CRI) when tailoring our services to specific customers or industries. CRI initiatives help protect carpet life, beauty, and demonstrate carpet's air quality benefit. NAEYC provides recommendations for cleaning quality in day care centers and preschools for instance.

Industry Training & Certification

Spotsmith technicians achieve and maintain industry training and certification regularly through IICRC programs.

Insurance Certificates

Spotsmith maintains complete business insurance: Auto, Liability, Janitorial Bond, and Workman's Compensation.

Clean, well-maintained floors are safer and more slip resistant than dirty floors. They are less susceptible to damage and wear. Well-maintained floors look nicer, are healthier, and last longer.

Spotsmith is a family-owned and operated business.

Our business is designed to attract happy, satisfied customers. We implement practices every day that focus on knowing customers better, in order to serve them better.

At Spotsmith, we teach our employees more than just cleaning techniques. We teach them our business. They understand how our business works, and why we deliver services to funeral homes in a slightly different manner than other customers. The result is an unparalleled level of service and the most thorough cleaning for funeral home.

Spotsmith has earned a reputation among funeral providers for quality work and superior customer service. We know what to do and we get it done. We make sure that each customer is satisfied with our work before we move on to other projects.

Wood Floor Cleaning & Polishing

Tile & Grout Cleaning & Sealing

Marble & Stone Restoration Cleaning & Sealing

Cement Restoration Cleaning

Vinyl, Linoleum, & Rubber Restoration

Treated

Untreated

Carpet & Fabric Protectors

Protectors keep dirt from sticking to fibers, making it easier to care for carpet and upholstery.

Carpet and fabric protectors are designed to repel most liquids, allowing spills to be removed before staining and wicking-the migration of soil to the tips of the yarns during the drying process -can occur.

We include at no extra charge fabric protectors to all upholstery furniture cleaning. We encourage funeral directors to have protector applied to carpet at a nominal cost.

Truck Mounted Hot Water Extraction Cleaning

The most widely recommended cleaning method among carpet manufacturers.

Spotsmith employs the truck mounted hot water extraction method of cleaning.

A hot water cleaning solution is sprayed onto the carpet to break down soil and other contaminants. The solution along with the carpet soil and contaminants are immediately extracted.

The Most Thorough Carpet Cleaning

Every cleaning begins with a meticulous inspection where we provide you with an honest evaluation of what to expect from our cleaning.

Wall to Wall/Corner to Corner Cleaning

We move virtually all furniture and fixtures, treating each piece as if it is your own – carefully. We return each piece to where we found it protecting it with plastic furniture tabs or furniture blocks.

Individual Attention to Spots & Spills

Different spills require different treatments and cleaning agents. We address each one prior to beginning the cleaning process. It increases the likelihood that each spot or spill will be removed.

Pre-Treat, Agitate, & Dwell

A proper cleaning of carpet requires deep penetration into the fiber of the carpet. We pre-treat each carpet with a cleaning agent specific to the carpet fabric. We agitate it deep into the fabric using a special carpet brush and let it dwell for period of time. This allows the cleaning agent to break-up soil and contaminants deep into the entire carpet, not just the surface.

Hot Water Extraction Cleaning

A hot water cleaning solution is sprayed onto the carpet to further break down soil and contaminants. The solution is immediately removed along with the carpet soil.

Neutralized, Deodorized, & Groomed

We mist a neutralizing agent into the carpet to preclude the rapid re-soiling of the carpet. It works to soften fibers and preclude browning during the drying process. We also mist a deodorizer into the carpet that removes odors as it evaporates from the carpet. We groom the misted solutions into the carpet using the carpet brush to ensure penetration of the entire carpet.
